DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

Re claim 5: Substitute "POV" with -- Photosensitive Optically Variable (POV) -- (see line 2).

Re claim 6: Insert -- image -- before "segments" (see line 3).

Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

3. Claims 1-8 are allowable over the prior art.
4. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record, taken alone or in combination, fail to teach or fairly suggest, in conjunction with other limitations in the claims, a document printed with a security marking having at least two image segments printed with ink that forms images which are visible both to viewing under white light and as fluorescent images when irradiated with ultraviolet light. The image segments have features of different sizes, wherein the sizes of the two image segments provides a detectable difference in fluorescent image sharpness.
5. As allowable subject matter has been indicated, applicant's response must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 C.F.R. § 1.111(b) and section 707.079(a) of the M.P.E.P.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cameron (US 6,685,094) discloses a thermochromic bar code; Greene (US 6,530,601) discloses a security system for a document utilizing fluorescent snippets on the document; and Puckett et al (US 6,165,937) discloses a thermal paper with a near infrared radiation scannable data image.
